

# The one Group Report

## WIREFRAMING

## USE SEQUENCE STRATEGY

The progression of steps within the user interface for a smoother process.

### Accessing users' transcripts and registered courses

- User opens the university app on their device.
- Enter their credentials (username/email/password..) to login to the application.
- When login is successful, the user is directed to the homepage.
- User finds the section for transcripts and courses.
  - Selects to view their transcript. The application retrieves and shows the transcript.
  - Selects to view their registered courses. The application shows the courses the user is/was enrolled in.

### Quick Login to other University platforms

- User opens the university app on their device.
- Enter their credentials (username/email/password..) to login to the application.
- When login is successful, the user is directed to the homepage.
- User finds 3 quick login buttons labeled; "ALMS", "OBS" and "STIX".
- User selects and clicks the platform they want.
- User is logged into the platform they selected through the university app.

**Receive and open notifications**

- User's device receives notification (event, financial status, deadlines...)
- The notification is displayed on the screen.
- User clicks on the notification banner.
- User is directed to related page.
